

Climate/Water Primer: Interdisciplinary Program at Selkirk

Photo: Patty Kolesnichenko

Mainstreams' Instructor Patty Kolesnichenko joined with Selkirk Teacher Jenn Meens to teach our Wetlands Program to Geography students. Students got an in-depth look at wetlands through hands-on exploration and discovery at Eimer's Lake in the Kimberley Nature Park. The Climate and Water Primer is a Mainstreams interdisciplinary program at Selkirk which is funded by both **Fortis BC** and **BC Hydro**. The combined funding is allowing us to expand Climate and Water Primer to Mt. Baker Senior Secondary in Cranbrook.
