

**Beaver Program at the Pilot stage**

Instructors Kim and Patty have been hard at work designing and producing a distributed learning version of the Beaver Program. After a month's work the result is slick and professional.

Delivering it to students at home will be different from delivering it to students in class.

When schools open fully, Mainstreams will be using Distributed Learning to reach students in all areas of the Columbia Basin. This will allow us to increase our reach while minimizing the risks and expense of travel.

**Teachers: if you are interested in piloting the Beaver program, please contact Kim at [kim.urbaniak@gmail.com](mailto:kim.urbaniak@gmail.com), or Patty at [wolfsong1@shaw.ca](mailto:wolfsong1@shaw.ca)**

**MEMBERSHIP**

- Teachers must be Mainstreams members to book our programs
- Membership is free
- Membership form? e-mail me at: [jimcsduncan@gmail.com](mailto:jimcsduncan@gmail.com)

**Goats, Weeds 'n Water also at Pilot stage**

Laura, Patty, Cailey and Jim have been designing an exciting program focused on goats, invasive plants and healthy streams. The classroom version of this program will sometimes involve live goats!

In the meantime, Mainstreams is offering a Distributed Learning version of Goats, Weeds 'n Water. Teachers interested in piloting this program should contact Patty at [wolfsong1@shaw.ca](mailto:wolfsong1@shaw.ca)

Mainstreams, Friends of Lois Creek and Kimberley Trail Society combined efforts to do a habitat restoration project in the Lois Creek Trails.

Funding from The Trust allowed us to hire Vanhana Nature Rehabilitation (Cailey Chase and Goats) to treat invasive plants.

Cailey and goats -- Lois Creek Trails

None of Mainstreams Programs would exist without these funders.
