

Planting: Mark Creek at St. Mary/Beale St. Bridge

Shannon Duncan

Laura Duncan and Kai McCurry

Neighbourhood kids gave us a hand

In ideal weather, Mainstreams crews planted shrubs, and trees in what is becoming one of Kimberley's most popular hang-out sites just below the St. Mary/Beale St. bridge.

Mainstreams wants to enhance riparian vegetation, which is vital to the health of Mark Cr.

Plants retain soil, prevent erosion, offer food and refuge for birds, insects and small mammals, provide shade in summer heat and add to the beauty of Mark Creek.

Mainstreams is seeking new Board Members.

If you support Water Education and Riparian Habitat Restoration, please put your name forward. We have five virtual meetings each year. You can join in on projects, or be a trusted guide. It's a great opportunity.

Leave your contact information at info@mainstreams.ca and we will be in touch

None of Mainstreams Programs would exist without these funders.
