

Gordon Terrace at Kinsmen Park 2004

Grave
Creek
Tour
2004

Mainstreams began in 2004 with School Water Education and Water Restoration. Photos above show Gordon Terrace school doing Creek Science and Grave Creek, Montana International Restoration Tour. We now have 9-School Programs and continue Habitat Restoration on Mark Creek and Joseph Creek. It's been a wonderful journey.

We are 16 Years Old

Keeping Mainstreams afloat is harder. You would think after all our success it would get easier, but alas... funding is harder to get.

Mainstreams raises money to provide school programs to augment prescribed curriculums. We are able to do this with funding from the organizations listed below.

The same goes for Mainstreams' habitat restoration projects in Mark Creek and Joseph Creek.

To help with funding, our Board decided to create a Mainstreams Membership. This will establish a community identity to make it easier for people to engage and support Mainstreams programs and projects.

Mainstreams Membership...

Benefits..

1. Easier to provide feedback to improve existing and create new programs
2. Able to book Mainstreams' 9-school program -- Yes, you will need to be a member to use our programs
3. Opportunity to build connections so we can all stay in tune
4. Able to keep up-to-date on program changes and opportunities
5. Your membership helps our fund raising so Mainstreams can continue to grow
6. A chance to serve as a Board member to shape and secure Mainstream's future

Kootenay Orchards students learning Creek Science

None of Mainstreams Programs would exist without these funders.
